**25<sup>th</sup> August 2022.**

To our stakeholders:

We recognize that a key requirement for participation in the UN Global Compact is the annual preparation and posting of a Communication on Progress (COP) that comprises a CEO statement of continued support for the UN Global Compact, a description of practical actions with regard to the principles of the UN Global Compact, and a measurement of outcomes or expected outcomes.

We are late in creating, sharing and posting our COP report due to unforeseen delays in the planned transition of our resource management and tracking platform. As part of our Communication on Progress, we wish to deliver to all stakeholders a quantitative assessment of our progress towards building a more sustainable and equitable company. Our resource management and tracking platform is one of the key tools we use to set measurable, verifiable, and time-bound goals. The unforeseen delay in the transition of this system limits our present ability to generate a Communication on Progress that meets our standards and the expectations of our stakeholders.

We hereby ask for an extension period in order to be able to post a Communication on Progress that describes our company's efforts and progress to implement the principles of the UN Global Compact. Our new COP report will be posted on the UN Global Compact website by the 24th of October, 2022 at the latest.

Sincerely yours,  
For and on behalf of  
Trinity Energy Limited
