

Sustainability Reporting

Sustainability has always been a priority for SunRice. It's at the core of everything we do.

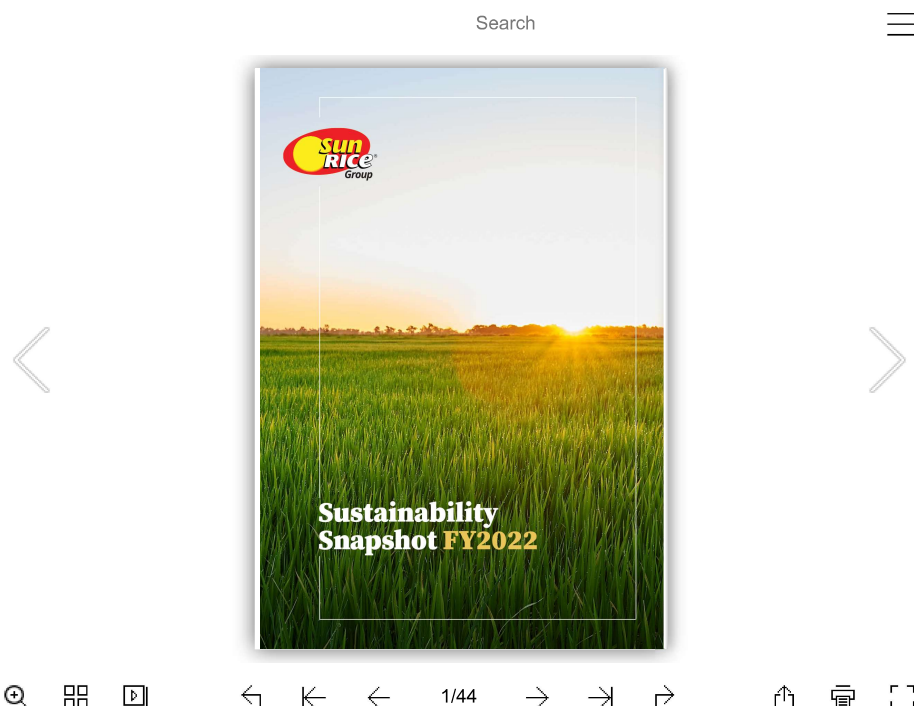

Since our earliest days, we've understood that our success depends on sustaining the health of both the fields and the communities in which we operate around the globe.

Each and every one of us is committed to positively impact the world with a reputation of integrity, transparency, and good corporate governance.

We sustain places. We sustain lives. We make a difference every day.

Our Latest Sustainability Report

The latest SunRice Sustainability Report is integrated into our 2022 Annual Report. To make it easy to find the sustainability information in one place, we have assembled relevant sections as well as our sustainability performance data and GRI Index into one  [downloadable snapshot](#).

Our Sustainability Framework

Our Sustainability Framework brings together what SunRice has done well for 70 years - leveraging the strengths of our core business, our ability to generate sustainable returns for key stakeholders with our ability to deliver on societal, community and global needs. We understand that our investment in sustainability is key to delivering on the 2022 Growth Strategy.

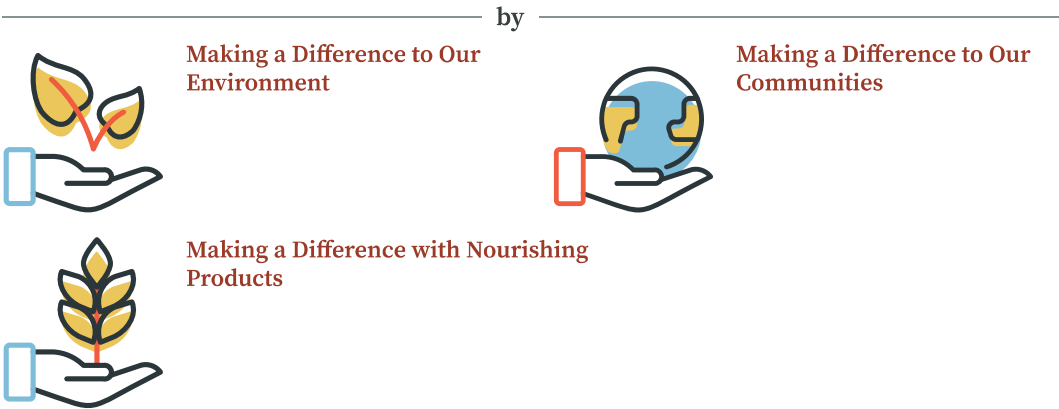

Our Framework aligns the issues our stakeholders have told us are material under seven focus areas where our business can relate and affect change. As we drive performance, we create impact under three pillars: Making a Difference to our Environment, our Communities and with Nourishing Products. We do this to contribute to the UN Sustainable Development Goals and deliver results to all of our stakeholders.

Our Approach to Sustainability

We share our approach to sustainability governance and performance below.
