USA

Dear Mr. Secretary-General,

Respected Sir/Madam,

I am Amna Nasir Jamal, runs small company named SAN Enterprises.

“A MAN may die, nations may rise and fall, but an idea lives on.”--- J.F. Kennedy.

It depicts connection between my purposes to be among leaders, my contribution and what I will gain. I am pleased to confirm that **SAN Enterprises** supports the ten principles of the Global Compact on human rights, labour, environment and anti-corruption. With this communication, we express our intent to implement those principles. We are committed to making the Global Compact and its principles part of the strategy, culture and day-to-day operations of our company, and to engaging in collaborative projects which advance the broader development goals of the United Nations, particularly the Sustainable Development Goals. **SAN Enterprises** will make a clear statement of this commitment to our stakeholders and the general public.

We recognize that a key requirement for participation in the Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the ten principles and support any specialized UN Global Compact issue platform that our company may join at a later date. We support public accountability and transparency, and therefore commit to report on progress within *one year* of joining the Global Compact, and *annually* thereafter according to the Global Compact COP policy.

Under Corporate Social Responsibility (CSR) the SAN Enterprises initiated program with **Tavvun Welfare Association.**

Working areas/ strategies/ services/programs and projects:

- 1- Education sector development programmes or Education for sustainable development
- 2- Special focus on Girls Education
- 3- Capacity Building

- 4- Fight against corruption
- 5- Health, art and environment education
- 6- Special children welfare
- 7- Human rights protection with special emphasis on women and children basic human rights.
- 8- Women protection programs/Violence against women, Women empowerment programs (to enhance women economic role and decision-making capacity)
- 9- Poverty reduction strategy
- 10- vocational training and learning resource center (to learn basic skills which would surely contribute to their personal development)

Social and political factors have a significant influence on women's ability to participate in the economy. Apart from legal discrimination and harassment, women are often disadvantaged in the trade environment due to lack of market information, low capital and trading volumes, and time, mobility, and literacy constraints. In practice, however, such requirements are more likely to limit the participation of women traders, who may have slimmer profit margins or greater conflict between work and home responsibilities.

Whenever I assess where I am, somehow feel there is a gap between contributions and limitations and practice. I am longing to contribute to the scholarly requirements of the field of knowledge and business but also need to develop the potential to contribute to the practical requirements of practitioners' knowledge.

Sincerely yours,

Syeda Amna Nasir Jamal
