Dear Mr. Secretary-General:

I am pleased to confirm that Cummins Inc. supports the 10 principles of the Global Compact with respect to human rights, labor, environment and anti-corruption.

With this communication, we express our intent to advance those principles within our sphere of influence. We are committed to making the Global Compact and its principles part of the strategy, culture, and day-to-day operations of our company and engaging in collaborative projects such as the Model Village project in India. We will make a clear statement of this commitment to our stakeholders and the general public.

We recognize a key requirement for participation in the Global Compact is the annual submission of a Communication on Progress (COP) report that describes our company's efforts to implement the 10 principles. We support public accountability and transparency, and therefore commit to continuing to report on our progress. Cummins has published a Sustainability Report since 2003 and has reported to the Global Reporting Initiative, Core Compliance, since 2015. In addition, we have reported our efforts to manage greenhouse gas emissions (since 2006) and water (since 2012) to the Carbon Disclosure Project. We will ensure that our reports continue to include:

- A statement signed by the chief executive expressing continued support for the Global Compact and renewing our ongoing commitment to the initiative and its principles (this is separate from our initial letter of commitment to join the Global Compact);
- A description of practical actions (including references to policies, procedures, etc.) that the company has taken or plans to take to implement the Global Compact principles in each of the four issue areas; and
- A measurement of outcomes, such as meeting public goals or performance indicators.

Sincerely yours,
