

H.E. António Guterres  
Secretary General  
United Nations  
New York, NY 10017  
USA

Monday, 30 July, 2018

Dear Mr. Secretary-General,

I am proud to announce on behalf of StormGeo that we support the ten principles of the Global Compact in regards to human rights, labor, the environment and anti-corruption.

This letter is a declaration of our intent to uphold and actualize these principles—utilizing resources, expertise and thought leaders within StormGeo to do so. We are committed to prioritizing the Global Compact and its principles within the culture and operations of our organization, and to engage in partnerships that will advance the broader goals of the UN, particularly the Sustainable Development Goals and the Action Platform for Sustainable Ocean Business. StormGeo is pleased to make this commitment known to our staff, stakeholders and the general public.

We recognize that a key requirement for participation within the Global Compact is the annual submission of a Communication on Progress (COP) that describes StormGeo's efforts to implement the ten principles. We support public accountability and transparency, and therefore commit to report on our progress within one year of joining the Global Compact, and annually thereafter according to the Global Compact COP policy. This includes:

- A statement signed by the chief executive expressing continued support for the Global Compact and renewing our ongoing commitment to join the Global Compact.
- A description of practical action (i.e. disclosures of any relevant policies, procedures or activities) that the company has taken or plans to undertake to implement the Global Compact principles in each of the four issue areas (human rights, labor, environment and anti-corruption).
- A measurement of outcomes (i.e., the degree to which targets/performance indicators were met, or other qualitative or quantitative measurements of results.)

I look forward to the collaboration of key StormGeo stakeholders, myself included, on August 16, 2018, in which we plan and discuss how to best contribute to the Global Compact.

Kind regards,

Per Olof Schroeder  
CEO, StormGeo
