H.E. António Guterres
Secretary-General
United Nations New York, NY 10017
USA

Dear Mr. Secretary-General,

I am pleased to confirm that **Circular Systems SPC** supports and is committed to accelerating the Ten Principles of the United Nations Global Compact on human rights, labour, environment and anti-corruption. **With this letter, we express our intent to implement these principles into the fabric of our business.** We are devoted to making the UN Global Compact and its principles part of the strategy, culture and day-to-day operations of our company, and to engaging in collaborative projects which advance the broader development goals of the United Nations, particularly the 17 Sustainable Development Goals (SDGs). We are proud to announce that our award winning **Agraloop Bio-refinery directly engages all 17 of the SDGs** (Please see attached SDG report for more information).

We at Circular Systems, believe in restorative business. Our circular technologies are focused on surpassing conventional approaches to sustainability – offering regenerative benefits for the planet and its people. The Agraloop Bio-refinery provides local communities with surplus clean bio-energy, organic soil amendments, and plant derived bio-chemicals.

Circular Systems will make a clear statement of this commitment to our stakeholders and the general public. We recognize that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the Ten Principles. We support public accountability and transparency, and therefore commit to report on progress within one year of joining the UN Global Compact, and annually thereafter according to the UN Global Compact COP policy. This includes:

- A statement signed by the chief executive expressing continued support for the UN Global Compact and renewing our ongoing commitment to the initiative and its principles. This is separate from our initial letter of commitment to join the UN Global Compact.
- A description of practical actions (i.e., disclosure of any relevant policies, procedures, activities) that the company has taken (or plans to undertake) to implement the UN Global Compact principles in each of the four issue areas (human rights, labour, environment, anti-corruption).
- A measurement of outcomes (i.e., the degree to which targets/performance indicators were met, or other qualitative or quantitative measurements of results).

Sincerely yours,

Isaac Nichelson
