H.E. António Guterres

Secretary-General

United Nations

New York, NY 10017

USA

Dear Mr. Secretary-General,

I am pleased to confirm that FATRI United Testing & Control (Quanzhou) Technologies Co, ltd. supports the Ten Principles of the United Nations Global Compact on human rights, labour, environment and anti-corruption. With this communication, we express our intent to implement those principles. We are committed to making the UN Global Compact and its principles part of the strategy, culture and day-to-day operations of our company, and to engaged in collaborative projects which advance the broader development goals of the United Nations, particularly the Sustainable Development Goals. FATRI United Testing & Control (Quanzhou) Technologies Co, ltd. will make a clear statement of this commitment to our stakeholders and the general public.

We recognize that a key requirement for participation in the UN Global Compact is to submit an annual progress report (COP) that describes our company's efforts to implement the Ten Principles. Strongly supportive of public accountability and

transparency, it is committed to reporting progress under the GLOBAL Compact COP policy within one year of accession and every year thereafter. Centaurs will continue to develop and manufacture core technologies, products and services to improve human health, the environment and safety with a reverence for life. And integrate the global compact and its ten principles into the business logic and culture, and manage the business with the global compact standards and fully assume corporate social responsibility."

Under the global concept of "energy conservation and environmental protection", FATRI has been actively promoting the development and promotion of environmentally friendly technology - wind turbine vibration monitoring system. By using new technologies and new models, We can improve equipment utilization rate, increase power generation, timely diagnose and give early warning for faults, and realize automatic, real-time, intelligent and networked health monitoring of wind power units, so as to promote the brand new upgrade of wind power industry. The application of FATRI to join the UN Global Compact is an important measure to promote the sustainable development of enterprises in accordance with international standards. In the future, We will deepen our cooperation with the UN Global Compact to lead the sustainable development of China's smart chip industry.

Sincerely yours,

Bill Nie, Chairman and CTO of FATRI ( Future Advanced Technology Research Institute )
