

H.E. António Guterres
Secretary-General of the United Nations
New York, NY 10017 USA

Turin 01/12/2021

Dear Mr. Secretary-General,

I am pleased to confirm that *Tunnel Euralpin Lyon Turin* supports the ten principles of the UN Global Compact with respect to human rights, labor, environment and anti-corruption. *Tunnel Euralpin Lyon Turin* has been member of the Global Compact since 2015. We are a French-Italian company and since 2015 until now, we have supported only Global Compact Network France. With this commitment, we express our intent to continue to support the Global Compact by joining the Global Compact Network both in France and in Italy. In addition, through this letter, we make a clear statement of this commitment to our stakeholders and to the public supporting the Global Compact Network France and the Global Compact Italy Foundation.

As in the last 5 years, we also pledge to participate in and engage with the UN Global Compact, in France and in Italy, in the following ways:

- Proposing and implementing partnerships on corporate sustainability and engaging with other stakeholders and with our supply chain;
- Supporting UN Global Compact business participants as they implement and report on their sustainability efforts,
- Engaging with Global Compact Local Networks France and Italy;
- Joining and supporting communication platforms and work streams.

We recognize that a key requirement for participating in the Global Compact is the submission of a Communication on Engagement (COE) that describes our organization's efforts to support the implementation of the ten principles and to engage with the Global Compact. We support public accountability and transparency, and therefore commit to report on progress within two years from joining the Global Compact and every two years thereafter according to the Global Compact COE policy. Our next Communication on Engagement is expected for November 2 2021 as the first date of registration to the Global Compact.

Sincerely yours,

Mario Virano

TELT General Director
