Corporate Sustainable Development (CSD)

Responsible growth

Computacenter recognises that our people and the societies and environment within which we operate are integral contributors to delivering value and supporting our key strategic aspirations. Whilst we pride ourselves on the provision of technologically advanced information solutions, we recognise that our business occurs within a wider community including employees, shareholders, customers, suppliers, business partners and the natural environment as a whole.

In 2007, the Group has been committed to the 10 core principles of the United Nations Global Compact ('UNGC'), aimed at demonstrating ethical, environmental and social responsibility towards our own workforce and in our business interaction within each community and country we operate. In 2009, the Group published its first Communication on Progress ('CoP') on the UNGC website, followed by our second and third CoP's in April 2010 and 2011. Additionally, the Group retains its membership to the FTSE4Good Index Series. The Group's CSD Policy is annually reviewed by the highest governance structure, the Group Board and the policy is executed and monitored through the facilitation of the Group CSD Committee, constituted out of representatives from across the Group as a whole.

Integral to this commitment, we strive to incorporate the UNGC and its principles into our strategy, culture and day-to-day operations. We do this through the development, communication and implementation of relevant policies to manage and monitor our progress towards these principles. Since our commitment to the core principles, we have adopted and revised a number of policies and procedures across the Group.

We support public accountability and will publish, as part of our annual Business Review, a Report on Progress. We are also communicating our sustainability efforts and achievements with all our shareholders in the Annual Report and Accounts, as well as our Company website. We believe that what is not measured is not effectively managed and in line with this, we are endeavouring to identify at least one standard indicator ('SI'), as recognised by the Global Reporting Initiative ('GRI'), per core principle. In this regard, we have made progress, but there remains more work to be done over the next years.

Computacenter will seek to collaborate with and encourage our suppliers, contractors and customers to operate in a similar socially responsible manner, as guided by the UNGC ten principles. We have already secured support from the majority of our suppliers and contractors, but we acknowledge that this will be an ongoing task.
