Dear Secretary-General,

I am pleased to confirm that the International Fertilizer Association (IFA) supports the ten principles of the UN Global Compact with respect to human rights, labour, environment and anti-corruption. With this commitment, we express our intent to support the Global Compact in advancing these principles and will make a clear statement of this commitment to our members and the general public.

IFA is aiming for sustainability in fertilizer production and use globally. The standards we advocate are commensurate with the framework of the UN Global Compact's Food and Agriculture Business Principles (FABs) to advance sustainability globally in this sector. We are committed to working with the UN Global Compact to promote the FABs in conjunction with our own standards to drive greater uptake of sustainability standards and certification by businesses in the agriculture sector.

We understand that participation in the Global Compact requires us to submit a Communication on Engagement (COE) within two years and thereafter biennially. Our COE will describe IFA's collaboration with the Global Compact and how we support its ten principles through the FABs.

Sincerely yours,

Charlotte Hebebrand
Director General
