USA

Dear Mr. Secretary-General,

I am pleased to confirm that Enerji Ekonomisi Derneği (the Turkish Association for Energy Economics) supports the ten principles of the Global Compact on human rights, labour, environment and anti-corruption.

With this communication, we express our intent to support those principles within our organization and sphere of influence.

We are committed to making the Global Compact and its principles part of the strategy, culture and day-to-day operations of our Association, and to engaging in collaborative projects which advance the broader development goals of the United Nations, particularly the Millennium Development Goals.

Enerji Ekonomisi Derneği will make a clear statement of this commitment to its members and the general public. We recognize that a key requirement for participation in the Global Compact is the submission of a Communication on Engagement (COE) that describes our organization's efforts to support the implementation of the ten principles and to engage with the Global Compact. We support public accountability and transparency, and therefore commit to report on engagement within two years of joining the Global Compact, and every two years thereafter according to the Global Compact COE policy. This includes:

- A statement signed by the chief executive expressing continued support for the Global Compact and renewing our ongoing engagement to the initiative and its principles. This is separate from our initial letter of engagement to join the Global Compact.
- A description of practical actions (i.e., disclosure of any relevant policies, procedures, activities) that the Association has taken (or plans to undertake) to implement the Global Compact principles.
- A measurement of outcomes (i.e., the degree to which targets/performance indicators were met, or other qualitative or quantitative measurements of results).

Sincerely yours,

Prof. Dr. Gürkan Kumbaroğlu
President, The Turkish Association for Energy Economics (EED)
