## Letter of Commitment

I am pleased to confirm that Aros electronics AB supports the ten principles of the UN Global Compact with respect to human rights, labour, environment and anti-corruption. With this communication, we express our intent to advance those principles within our sphere of influence. We are committed to making the UN Global Compact and its principles part of the strategy, culture and day-to-day operations of our company, and to engaging in collaborative projects which advance the broader development goals of the United Nations, particularly the Millennium Development Goals. Aros electronics AB will make a clear statement of this commitment to our stakeholders and the general public.

This is our first Communication on Progress describing our integration of implementing the UN Global Compact principles into our business. We recognize that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's effort to implement the ten principles. We support public accountability and transparency, and therefore commit to report on progress within one year of joining the UN Global Compact, and annual thereafter according to the UN Global Compact COP policy. This includes:

- A statement signed by the chief executive expressing continued support for the UN Global Compact and renewing our ongoing commitment to the initiative and its principles.
- A description of practical actions that Aros electronics has taken to implement the UN Global Compact principles in each of the four areas (human rights, labour, environment and anti-corruption).
- A measurement of the outcome (i.e., the degree to which targets/performance indicators were met, or other qualified or quantitative measurements of results).

## Aros electronics AB

Aros electronics provides solutions for motor and drives. We develop and produce totally integrated electronic solutions for customer unique industrial and vehicle applications.

Our experienced design team consists not only of high competent technology experts within motor design, motor control, power electronics, embedded systems and mechatronics, but also a multi-disciplinary skilled application engineers that will follow the project from concept stage to beyond start of production.

Aros electronics is both ISO 9001 and ISO 14001 certified, with the target of being ISO/TS 16949 certified in the end of 2016.

Tomas Rundberg  
CEO
