

H. E. Ban Ki-moon
Secretary-General
United Nations
New York, NY 10017
USA

I wish you to take a look at the book, "GAIA: A New Look at Life on Earth," by the scientist Dr. James Lovelock. This book scientifically suggests that our planet is made suitable for life through the cooperation and interaction of living organisms and their inanimate surroundings. This is how the environment has evolved into a living system, maintaining life for billions of years—a rare event in our universe. However, the planet has felt a great impact on its ability to maintain a suitable environment for life with the rise in human population. There is clearly a need to change our lifestyles towards caring for the Earth, and businesses must work harmoniously with all people and the planet to make a firm commitment to realize a low carbon society and care for our rich biodiversity.

With above in mind, and as President and CEO of Saraya Co., Ltd, I am pleased to inform you that SARAYA will become a supporter of the United Nations Global Compact. Thus I hereby proclaim our support for the ten principals of the Global Compact with respect to human rights, labour standards, environment and anti-corruption, and we pledge to implement the Global Compact into our strategy, corporate culture, and all our daily operations. In this regard, we promise to positively share our activities and vision, and then communicate with our stakeholders and the people on this planet through the submission of a Communication on Progress.

Sincerely yours,

Yusuke Shiro Saraya
President & CEO
