The Fundación Monge is committed to supporting the ten principles of the UN Global Compact. We will publicly commit to the advancement of the ten principles both in our existing programs and in the ones we will undertake in the future.

We are committed to working to further the Compact's goals, particularly those pertaining to social sustainability. Our focus on financial aid to students in vulnerable conditions (and their employment after they have achieved their high school or technical diplomas) is essential to closing the inequality gap and the pursuit of decent, sustaining employment for all. Our partnerships with public organizations and private companies alike puts us in an excellent position to expand the scope of our organization, both in number of students reached and in the extent of our "supplemental education". Our supplemental programs include workshops on employability, sustainability, and wholesome education; some of which have important overlaps with the UN Global Compact's goals.

We understand that our participation in the UN Global Compact is dependent on our regular submission of a Communication on Engagement, describing our current and future efforts to uphold and further the ten principles of the UN Global Compact. We commit to submitting this report within two years of joining the UN Global Compact, and to resubmit it every two years as is required by the UN Global Compact's policy on COEs.

Sincerely,

Byron Salas Conejo
Executive Director
Fundación Monge
